DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1, 8, 9 and 10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

With respect to claim 1, the specification indicate that the figure is a schematic illustration of a system and there is no support in the specifications that the metering chamber is remote from the storage tank.

With respect to claims 8 and 9, there is no disclosure in the specifications for liquid level sensors.

With respect to claim 10, there is no disclosure in the specifications for a time control delivery of fluid from the metering chamber into the brewing chamber.

In light of the above informalities, the claims have been examined as could best be understood by the examiner. The examiner's failure to apply prior art to any of the claims should not be construed as an indication of allowable subject matter.

Application/Control Number: 10/790,533 Page 3

Art Unit: 3754

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1, 2, 6, 7, 11, 12, 14, 15 and 17-19 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4,421,014 to Vicker.

Vicker shows beverage brewer as seen in Figs. 1 and 2, having an storage tank 44 for heated water, a brew chamber 170 for a single serve beverage, a metering chamber defined by the elements 50 and 70, a supply conduit 118 connecting the storage tank with the metering chamber, a delivery conduit 119 connecting the metering chamber with the brew chamber, air activated means 60 for withdrawing heated water from the storage tank, disposable cartridges 141 for beverages such as coffee, filter receptacle 140 and valves 120 operating in alternative modes in the connection conduits and storage tank.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 13 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 4,421,014 to Vicker in view of US 6,606,938 to Taylor.

Application/Control Number: 10/790,533

Page 4

Art Unit: 3754

Vicker shows all claimed features as discussed above except for air pressure use to empty the measuring chamber and piercing elements to introduce water into the cartridge and dispense beverage. Taylor shows an air pump 58 to empty the measuring chamber 16 and piercing elements 68 and 70 to introduce water into the cartridge and dispense beverage respectively. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to use pressurized air to empty the metering chamber and piercing elements to open a seal cartridge in the device of Vicker to maintain the freshness of the beverage as taught by Taylor.

Allowable Subject Matter

7. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

8. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

- 9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Paoletti shows a coffee-making machine. King shows an air supply for a coffee maker.
- 10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 10/790,533 Page 5

Art Unit: 3754

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melvin A. Cartagena whose telephone number is (571) 272-4924. The examiner can normally be reached on M-F (7:30AM to 4:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Y. Mar can be reached on (571) 272-4906. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
